Purchase or ground lease.
Drive thru required

WHAT IS SONIC?

Sonic revolutionized the fast food ordering process by using curbside speakers that allowed customers to place food orders without ever leaving their cars. Personal Carhop service is one of the many reasons customers enjoy visiting Sonic. Delivering the food to the car and returning to check on customer satisfaction is a trademark of Sonic service. In the strong demographics of the Washington DC market we anticipate seeing a small dining room in some locations for customers that prefer to be inside. Each restaurant will still have a number of stalls as well as a drive thru lane. Sonic has 3,527 drive-ins located in 45 states.
